

Monthly iHeat running cost guide

How much does the iHeat central heating system cost to run?

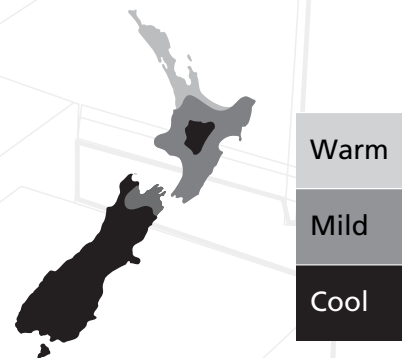

The guide below is an estimate and should only be used as a guide. Costs may vary due to multiple factors such as:

- construction of building
- type of insulation
- amount of windows and whether single or double glazed
- geographical location in NZ

Running costs are based on the standard operation of heating a whole living area of approximately 185 m² for eight hours a day (2 hours in the morning and six hours at night), heating to 21 °C.

For more extreme climates, for example Queenstown, please contact Rinnai to seek specific advice regarding running costs.

Gas type	Heating zone		
	Warm	Medium	Cool
Natural Gas	\$70-\$120	\$85-\$150	\$100-\$180
LPG	\$290-\$485	\$390-\$600	\$480-\$680
Approx. bottles/month	2-4	3-6	4-7

Natural Gas and LPG cost calculations

Natural Gas costs are based on the Genesis Energy Auckland charges as at 15 January 2014 (7.50c/kWh) including GST, a 10% prompt payment discount, and excluding the fixed line charge.

LPG costs are based on the Genesis Energy Auckland standard charges (\$113.80 per 45 kg bottle refill and standard delivery), including GST, and excluding LPG annual bottle rental, and excluding electricity running costs.

The cost of Natural Gas and LPG will differ in each area, please check with your local supplier.
