

Environmental Policy

Rinnai New Zealand is an importer, manufacturer, distributor and exporter of appliances that deliver comfortable living environments

At Rinnai New Zealand we recognize that our activities have the potential to cause environmental harm and to inefficiently use the world's scarce resources.

We accept our social and moral responsibility to minimize our impact on the environment by proactively managing our resource use and environmental footprint.

We will commit the necessary financial and human resources to effectively measure and manage our environmental responsibilities and will ensure that care of the environment and prevention of pollution is a key consideration in our work practices, processes and methods of operation.

Rinnai New Zealand's policy is to:

- Identify, monitor and quantify all environmental impacts of the business and to set and achieve specific targets consistent with our legal, moral and social responsibilities.
- Adopt a philosophy of continuous improvement to manage all environmental impacts.
- Integrate environmental objectives into relevant business decisions in a cost effective manner.
- Minimize waste and to recycle wherever this is economically practical.
- Ensure that our emergency response plans will effectively limit any negative environmental impact.

Policy Number:- 4.0	Issue Date: July 2012
Authorised by:-	Version: 2

- Influence, wherever possible, our business partners to minimize our collective environmental impact.
