

Producer Statement B2 durability

System

Rinnai INFINITY EF250 continuous flow water heater

Date: 05 July 2019

The product has an operating life span of around 10,000 operating hours, which equates to 2,000 hours per year, over a five year lifespan if the following conditions are met:

1. The appliance is regularly serviced in accordance with the Rinnai servicing instructions by qualified tradespeople.
2. Water quality standards, as detailed below, are maintained throughout the lifespan of the appliance.

TDS (Total Dissolved Solids)	Total hardness CaCO ₃	Alkalinity (as CaCO ₃)	Dissolved (free) CO ₂	pH	Chlorides	Magnesium	Sodium	Iron	Langelier Index
Up to 600 mg/L or ppm	Up to 200 mg/L or ppm	Up to 200 mg/L or ppm	Up to 25 mg/L or ppm	6.5-8.5	Up to 300 mg/L or ppm	Up to 10 mg/L or ppm	Up to 150 mg/L or ppm	Up to 1 mg/L or ppm	Between -1.0-0.8

Please note: The above operating life span and conditions relate only to the Rinnai INFINITY EF250 continuous flow water heater, not to any associated valves or fittings/pipework used or supplied with the appliance.
