

Compact Controller: History and compatibility

Compact Controller (MC601A)

Launched: 2018

Compatible with:

A-Series, N-Series, HD-Series, and EF26 - all current INFINITY models. Any INFINITY with an older MC912A controller fitted should be able to use this controller.

Deluxe bathroom (BC100V1Z) and Deluxe kitchen (MC100V1Z) controllers.

Compact Controller (MC912A)

Launched: 2005

Discontinued: Jul 2018—obsolete, no spares available.

Compatible with:

A-Series, HD-Series, EF26, VT-range, EFi250, EF250, and XR-Range.

Wireless controllers MC502S, MC503S. Compatible with current water heaters. Not compatible with older INFINITIES.

Compact Controller (MC911A)

Launched: 2003

Discontinued: 2005—obsolete, no spares available.

Compatible with INFINITY models made between 1985-2004 (approx.):

2402, 2406, 1616, 2408, 2418, 2020, 2022, 2424, 2425, V3203, V1616, V1818, V2020, V2626, V2632.

Not compatible with current Rinnai water heaters or controllers.

Old controller cables will be ok to use provided they are in good working order. Wire adjustment may be necessary at the controller end. All INF use a 12 V electrical system for controller connections. Power should always be turned off when any controllers are connected to an INF. This is to prevent damage to the main PCB, which if damaged will not be covered by warranty.

Kitchen Deluxe Controller: History and compatibility

Kitchen Deluxe Controller (MC100V1Z)

Launched: 2010

Compatible with: A-Series, N-Series, HD-Series, EF26 (all current models). These should also work with XR and VT series.
