Rinnai Pro Series

Designed for New Zealand's ever-changing

climate, the Rinnai Pro Series Ducted Heat Pump System provides both optimal heating

and cooling all year round – no matter where

Packed with innovative features including

Wi-Fi connectivity, fast cool/heat function

in providing complete comfort. This smart

system can also work around your unique

lifestyle with an ultra-practical timer function, allowing you to set the unit's operation times

to achieve the perfect room temperature.

With its stylish controller design the Rinnai Pro Series range is discreet, quiet and

simple to use. The perfect way to heat or

and sleep mode, the Pro Series is the ultimate

you live in the country.

cool your home.

Rinnai

Pr Series

Rinnai

At Rinnai, we're all about comfort

For over 45 years, Rinnai has supplied New Zealand homes with a range of appliances that help Kiwis to enjoy comfortable, safe and efficient lives. We've designed and manufactured products especially for New Zealand homes and New Zealand conditions – from heating your water, to heating and cooling your living areas. With over a million appliances sold over this time, Rinnai has established a proud reputation for quality and reliability, and become known as your total home living experts.

Designed and built for New Zealand conditions.

There's no weather in the world quite like what we experience in New Zealand. This means when you design a Heat Pump System, you need one that can stand up to whatever Mother Nature throws at it.

With that in mind, the Rinnai Pro Series is designed especially for New Zealand. Through product design, durable build materials, and organic coatings, we have developed the

Pro-Pel Coil Protection

The Rinnai Pro Series indoor and outdoor coils are coated with our unique, non-toxic Pro-Pel Coil Protection making them more resistant to oxidation and corrosion. This 100% environmentally friendly coating delivers greater longevity and sustained performance in coastal areas and other harsh environments.

Additionally, the hydrophilic properties of Pro-Pel Coil Protection effectively reduce bacteria growth and improve the low-temperature heating efficiency of the Pro Series by accelerating the defrosting process.

Wi-Fi Control

The Rinnai Pro Series features Wi-Fi control via an easy-to-use App.* Simple to setup via Bluetooth, it's never been easier to control your Heat Pump from anywhere in the world. It allows full control with Alexa and Google Home including voice commands and a clever geolocation function to auto on/off when you arrive or leave home – the ultimate in convenience and comfort.

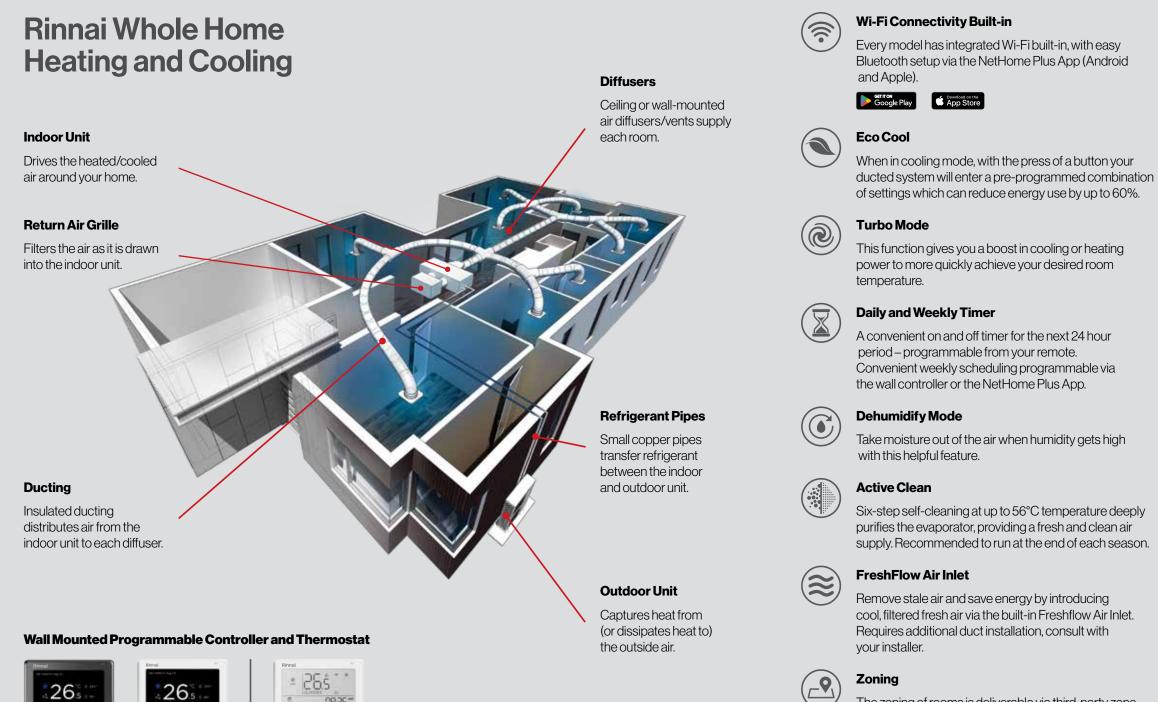

* NetHome Plus is a third party application independent of Rinnai.

Pro Series to better resist our harsh coastal environments where salt can have a devastating effect on lesser-designed products.

Particular thought has gone into our outdoor unit which includes stainless steel bolts, a clever case design to maximise water runoff, and a hermetically sealed electrical box, which all contribute to the increased overall durability of the series. All installation scenarios are provided for to ensure the best fit for your home. The two Slim Ducted models are ideal when space is restricted. These units also have the option of either rear or bottom supplied return air for more installation locations. To further minimise disruption, the large 18kW high efficiency inverter unit can be split in two for ease of positioning and installation. We've also built a product that operates just as well in our Southern winters as in our Northland summers, using precision components we achieve market leading operating efficiencies at even lower temperatures.

This is just some of the smart thinking that has gone into making the Rinnai Pro Series perfectly suited to where you live – New Zealand.

The zoning of rooms is deliverable via third-party zone controllers. Compatible systems include MyAir, Airtouch and iZone. Discuss with your installer for more information.
