

Rinnai Indoor stainless steel cylinders (mains / low-med pressure)

This diagram is provided to assist identifying parts if replacement is necessary. Contact your place of purchase or the manufacturer to enquire about parts, availability and/or service.

i Element replacement
Due to supply constraints some cylinders made in 2023 have different elements installed. To ensure ordering the correct replacement element, check if the cylinder has the below label. If it does order the code shown on the label.

ELEMENT SPARE PARTS LIST	
PART NO	DESCRIPTION
30060	ENAMEL 2KW
30061	ENAMEL 3KW
30062	STAINLESS STEEL 2KW
30063	STAINLESS STEEL 3KW
(* includes element seal & backnut)	
Torque tighten backnut to 12Nm	

20355: Blanking plate incl. gasket

If the top or bottom element is not needed the blanking plate can be used to 'blank' the unused connection.

20356: Backnut element

To replace old or damaged nuts for 30003 / 30004.

30002: 2 kW curved element

30004: 3 kW curved element

30006: 3 kW curved titanium element

Alternate element option for hard and aggressive water areas.

30011: Thermostat Robert Shaw yellow dial (MRT)

30015: Thermostat Robert Shaw red dial (ART)

30016: Thermostat retrofit kit

To replace pre-2009 TSR/ TSE thermostats (no longer available) in HJ Cooper mains pressure cylinders.

30017: Solar probe pocket

Temperature socket probe pocket, typically ordered when installing a solar system.

30018: TPR mains pressure 850 kPa 15 mm

Replacement TPR for mains pressure cylinders.

30019: Element cover box

To replace old or damaged covers.

30020: Element key

To remove element nuts—refer 20356 backnut element (image above).

30022: Element gasket (rubber seal)

To replace leaking or damaged seals. Two seals provided in the kit.

Note: As of June 2023, the element key is no longer included with the cylinder; it is now part of the element spare kit. DO NOT leave the element key inside the element enclosure due to potential electrical hazards.

30062: Kawai element 2 kW (has a temp. sensor pocket)

Includes seal and backnut.

30063: Kawai element 3 kW (has a temp. sensor pocket)

Includes seal and backnut.

Note: If you damage the seal and need a replacement, this can be ordered separately:
Code - 20937 (Element seal Kawai)
