It's Really Smart!

It's so smart it learns the pattern of hot water use and only heats the water when it knows it's going to be needed, typically saving up to 10%* on water heating costs!!

*Savings are influenced by a number of factors including cylinder size, hot water use profile and plumbing system design.

Low Pressure Hot Water Cylinders

Electric Prewired Low Pressure Undersink - Copper

Endless hot water

Endless options

Rinnai knows that simple is beautiful, which is why Rinnai INFINITY® continuous flow gas hot water systems keep it just that – simple. You'll never run out of hot water and you won't pay to keep it continuously hot either!

Key benefits and features:

- Cost Efficient: Only pay to heat the water you use.
- Efficient Design: Multiple units can be manifolded together to make larger systems and provide extra hot water capacity
- Space Saving: External units are located outside to give you more space indoors

Rinnai INFINITY® Gas Water Heater
