Rinnai ReadyFit 135/180L Cylinders

Rinnai ReadyFit 135/180L Cylinders

The mains pressure indoor outdoor ReadyFit enamel 135/180 litre cylinders are pre-valved and ready to install, saving valuable time and effort during the installation process.

This makes them especially suitable for high-volume specification projects, such as terraced houses and apartments, where multiple units need to be installed quickly and efficiently.

Features and Benefits

Save Time On-site

Quick installation for multi-unit buildings such as terraced houses and apartments.

Insulated Pipework

All hot pipes are insulated to ensure a standardised installation, enhancing the energy efficiency of the hot water system.

NZ Building Code Compliant

Meets revised NZBC requirements for sanitary water temperatures as per G12 AS1 and Cylinder energy performance as per H1.

Trusted 135L & 180L Enamel Indoor / Outdoor Cylinders

Trusted, high quality enamel cylinders featuring side connections and a cTech element.

Trusted Valves & Piping

High quality valves and pipes used in ReadyFit Cylinders: NZS 3501 Copper Pipes Watts cold water expansion valve Watts Tempering Valve and TPR valve

1 Year Parts Warranty

In addition to the standard mains pressure enamel indoor outdoor cylinder warranty, the ReadyFit warranty extends to cover faults in parts and pipework provided by Rinnai for the duration of one year following installation.

Leak Tested

Before shipment, all cylinders undergo leak testing, providing plumbers with peace of mind during commissioning and ensuring optimal installation on-site.

Plinth (Optional Accessory)

A plinth is an optional accessory available for installations where supplied catch pan drains cannot be made to align with the floor drain or to create the required fall for draining.
